AI Engineer · Full-Stack Developer · Applied AI Systems · Platform Engineer

PROFESSIONAL SUMMARY

Software Engineer with proven experience shipping AI-integrated, full-stack systems across defense, education, and e-commerce domains. Specializes in scalable API architecture, offline-first system design, and applied AI integration — with a track record of delivering production-grade applications from architecture to deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, FastAPI, Flask, REST APIs

AI / ML: OpenAI API, OpenCV, OCR, LangChain, Prompt Engineering

Databases: MongoDB, Firebase, MySQL, PostgreSQL

DevOps: Docker, Git, Vercel, CI/CD, Linux

EXPERIENCE & LEADERSHIP

Microsoft Learn Student Ambassador (MLSA) — Microsoft | *2023 – 2024*

- **Tech Team Head & PR Team Head** — led 2+ technical workshops on full-stack development and applied AI, reaching 20+ developers across campus and partner institutions.
- Mentored 5+ engineers through end-to-end project lifecycles.
- Organized 2+ hackathons and helped run a 100+ member MLSA chapter under the AKTU network with zero event cancellations.

PROJECTS

Military Offline Mapping & Alert Communication System *· Python · FastAPI · Leaflet.js · WebSockets · SQLite · LoRa*

- Built offline-first defense platform with 5km emergency broadcast radius; achieved <200ms message latency over a local mesh network with zero data loss on reconnection.
- Designed GPS tracking + offline tile-caching layer with encrypted payloads and role-based access control — functional in 100% air-gapped environments.

Real-world impact: Keeps soldiers, border patrols, and disaster-relief and rescue teams connected, navigable, and trackable in battlefields, remote terrain, and disaster zones where cellular and internet networks are down, jammed, or destroyed — helping prevent teams from being cut off when it matters most.

AI-Based Vulnerability Detection Platform *· Python · FastAPI · OpenAI API · React.js · MongoDB · Docker*

- Deployed an AI-assisted CVE scanning pipeline hitting 88%+ threat-classification accuracy across OWASP categories.
- Containerized the full stack via Docker for one-command deploy to any cloud — real-time dashboard with severity scoring and compliance-ready audit exports.

Real-world impact: Lets startups and small teams find and fix security holes before attackers exploit them — making professional-grade security auditing affordable without a dedicated security team, and helping protect everyday users' data from breaches.

AI Answer Sheet Evaluation System *· Python · OpenCV · Tesseract OCR · FastAPI · React.js*

- Built an OCR + NLP grading pipeline with 91%+ text-extraction accuracy; processes 5+ answer sheets in <120 seconds, replacing ~60% of manual evaluation effort.
- Configurable partial-credit engine with semantic-similarity scoring; outputs structured per-student reports as downloadable PDFs via a React.js admin dashboard.

Real-world impact: Frees teachers from hours of manual marking and gives students faster, more consistent, bias-free results — helping schools, universities, and large competitive exams grade at scale without expanding staff.

Freelance Full-Stack Engineering — 3 Production Clients *· React.js · Node.js · Firebase · MongoDB · Tailwind CSS · Vercel*

- Delivered 3 production apps (e-commerce, booking portal, admin dashboard) with 100% on-time completion and sub-2s load times; zero post-launch critical incidents.
- Integrated WhatsApp Business API, payment gateways, and JWT auth; managed the full lifecycle — discovery -> architecture -> deployment -> client handoff.

Real-world impact: Put real businesses online — enabling them to sell products, take bookings and payments, and run daily operations digitally, expanding their customer reach and automating routine customer interactions.

CERTIFICATIONS

Google Cybersecurity (Coursera) · AWS Cloud Practitioner Essentials · DeepLearning.AI Prompt Engineering for Developers · Google Generative AI (Cloud Skills Boost) · Microsoft Azure AI-900 (In Progress)

EDUCATION

B.Tech — Computer Science & Engineering (AI Specialization) — Meerut Institute of Engineering & Technology (AKTU) | *2022 – 2026*
