AI Engineer · Full-Stack Developer · Applied AI Systems · Platform Engineer

PROFESSIONAL SUMMARY

Software Engineer with proven experience shipping AI-integrated, full-stack systems across defense, education, and e-commerce domains. Specializes in scalable API architecture, offline-first system design, and applied AI integration — with a track record of delivering production-grade applications from architecture to deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript **Frontend:** React.js, Next.js, Tailwind CSS **Backend:** Node.js, FastAPI, Flask, REST APIs

AI/ML: OpenAI API, OpenCV, OCR, LangChain, Prompt Engineering **Databases:** MongoDB, Firebase, MySQL, PostgreSQL

DevOps: Docker, Git, Vercel, CI/CD, Linux

EXPERIENCE & LEADERSHIP

Microsoft Learn Student Ambassador (MLSA) — *Microsoft* 2023 – Present

- Led **2+ technical workshops** on full-stack dev and applied AI — reached **20+ developers** across campus and partner institutions.
- Mentored **5+ engineers** through end-to-end project lifecycles
- Organized **2+ hackathons** and managed **100+ member** MLSA chapter under AKTU network with zero event cancellations.

PROJECTS

1. Military Offline Mapping & Alert Communication System · Python · FastAPI · Leaflet.js · WebSockets · SQLite

- Built offline-first defense platform with **5km emergency broadcast** radius; achieved **<200ms** message latency over local mesh network with **zero data loss** on reconnection.
- Designed GPS tracking + offline tile caching layer with encrypted payloads and role-based access control — functional in **100% air-gapped environments**.

2. AI-Based Vulnerability Detection Platform · Python · FastAPI · OpenAI API · React.js · MongoDB · Docker

- Deployed AI-assisted CVE scanning pipeline hitting **88%+ threat classification accuracy** across OWASP
- Containerized full stack via Docker; one-command deploy to any cloud — real-time dashboard with severity scoring and compliance-ready audit exports.

3. AI Answer Sheet Evaluation System · Python · OpenCV · Tesseract OCR · FastAPI · React.js

- Built OCR + NLP grading pipeline with **91%+ text extraction accuracy**; processes **5+ answer sheets in <120 seconds**, replacing **~60% of manual evaluation effort**.
- Configurable partial-credit engine with semantic similarity scoring; outputs structured per-student reports as downloadable PDFs via React.js admin dashboard.

4. Freelance Full-Stack Engineering — 3 Production Clients · React.js · Node.js · Firebase · MongoDB · Tailwind CSS · Vercel

- Delivered **3 production apps** (e-commerce, booking portal, admin dashboard) with **100% on-time completion** and **sub-2s load times**; zero post-launch critical incidents.
- Integrated WhatsApp Business API, payment gateways, and JWT auth; managed full lifecycle — discovery → architecture → deployment → client handoff.
